MaSSH Scanner (by SiteGuarding.com)

USER GUIDE

Version 1.7

Installation

1. Connect to your server via SSH (e.g. use Putty) and use the "command line" (with root privileges) to install MalSSH Scanner for WHM.

Use the following commands:

```
cd /
```

```
wget https://www.siteguarding.com/files/malssh\_scanner.zip
```

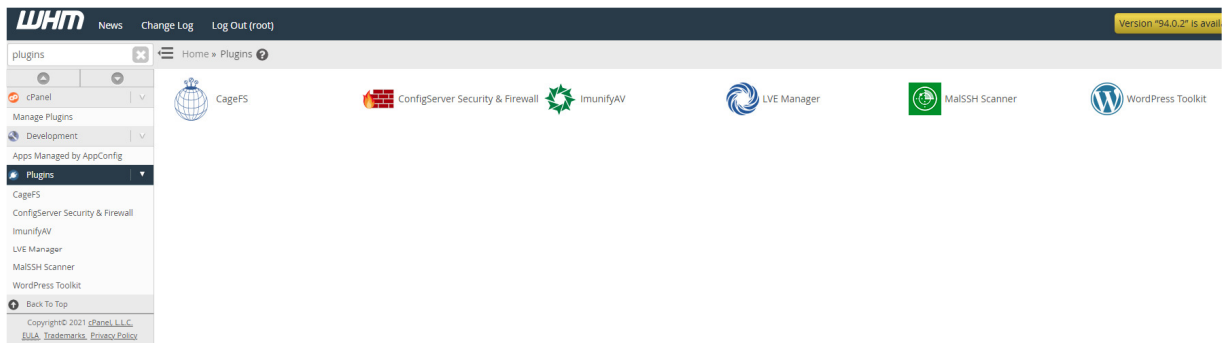

```
unzip malssh_scanner.zip
```

```
chmod u+x malssh_scanner.sh
```

```
./malssh_scanner.sh
```

- 1.1. If you have error message "IonCube Loader version 10 or higher is required for this plugin." You need to open **EasyApache 4** (WHM Dashboard > EasyApache 4) and install IonCube 10 extension for each version of PHP on your server.
 - 1.2. Make sure that default PHP version on your WHM is 7.4 (not 8.0) Go to WHM Dashboard > Software > MultiPHP Manager and select PHP 7.4

2. Go to WHM Dashboard > Plugins section.

3. Get the Serial number.

- 201.132.12.198
- 201.132.12.199

Multiselect. You can press CTRL and select multiple items.

5. MalSSH in cPanel account.

In cPanel account in Security section you will have an icon “MalSSH Scanner”. Users will be able to scan their websites and get the reports.

Uninstall

Connect to your server via SSH (e.g. use Putty), then run the following commands:

```
cd /
```

```
chmod u+x malssh_scanner_uninstall.sh
```

```
./malssh_scanner_uninstall.sh
```
